INSTITUTE DEVELOPS NEW INSTRUMENTS, VEGETABLE PAINT THICKENER -- Pravda Vostoka, 30 Jul 50

The Uzbek Scientific Research Institute of the Silk Industry has worked out a number of technical developments for improving the quality of silk, including a nonbreaking catch, which prevents breaking of the threads and the formation of lumps in unwinding cocoons.

A portable automatic air temperature and humidity regulator has also been designed for air-conditioning production laboratories.

The institute has done considerable work in improving dyes. A special expedition studied the vegetables of Uzbekistan and succeeded in obtaining a high-quality vegetable paint thickener. Plans are now under way for industrial use of the new thickener.
